

LEARN THE MONTHS OF THE YEAR

So, do you know how many months of the year there are? Twelve. Frankly, they all have weird names. But I have faith in you, that you can learn all twelve in order.

FLIP OVER FOR YOUR NEXT CHALLENGE

EARN THIS NUGGET

- Be able to place the twelve index cards in the correct order.
- Without the cards, say the twelve months of the year in order.

There are a bunch of ways you can learn them including some songs that have been written, so you may want to check some of those out. But I want you to get twelve index cards and write the twelve months on them.

Now, every day shuffle the cards and try to put them in order.

Practice saying the months as you do this.

1. January
2. February
3. March
4. April
5. May
6. June
7. July
8. August
9. September
10. October
11. November
12. December

Good luck, my friend.
