

PRESERVE WATER AND OTHER RESOURCES

Do you like nice stuff, cool toys, and fun trips out with the family? I bet you do, who doesn't? But all of those things cost money and have to be paid for. There is only so much that you can afford to do. Well something else costs money: water, electricity, gas. If we use these when we don't need them, then we have less money for fun stuff that we want to do, don't we?

FLIP OVER FOR YOUR NEXT CHALLENGE

EARN THIS NUGGET

For two weeks, make sure you don't waste water, electricity, or heat and AC. Your parents will be watching to see how you do.

LEVEL A

B10

- Water. I know what you're thinking. You'll save the planet and a ton of money by not having a bath. Not going to happen, Trailblazer. I tried that with my mom and she didn't buy it. But what you can do is only run that faucet when you really need to. Don't run the faucet when you brush your teeth, just a little bit at the beginning and end. Just be thinking of how you can reduce water and save money.

- Electricity is a biggie. Turn those lights off when you don't need them, and the TV too.

- Heat in the winter and air conditioning in the summer. It's expensive to keep the house warm or cool. So make sure doors and windows stay closed as much as possible and don't let that inside air escape outside.
