

## SET UP A PRINTER

Now, Cragsman, if you are going to use a computer, chances are you are going to need to use a printer also. This can be super easy, and other times, it can be an absolute pain in the neck. But the bottom line, if you are going to be a SkillTrekker, you need to be able to tackle a challenge like this. And if at first you don't succeed, try and try again. Then search Google for it, watch a YouTube video on the subject, and if absolutely necessary, get on a forum and ask questions. Gone are the days when you can just give up and leave it to be someone else's problem.

## FLIP OVER FOR YOUR NEXT CHALLENGE

### EARN THIS NUGGET

Set up that printer and print a note to your parents telling them how much you appreciate them and love SkillTrekks.

For this challenge, you are going to need one of two scenarios. You will either need a computer that you can try to connect to your home printer, or you will need to get hold of a different printer and try to connect your computer to it. Either way, it needs to be the first connection between this computer and printer.

- There are several different ways of connecting a printer. You can hardwire it via a USB cable, you can use the home network, or even Bluetooth if your equipment has that capability.
- If you are using a PC, you'll be starting in the Devices and Printers section, adding a printer there, and setting it up appropriately.
- If you are using a Mac, you'll be going through System Preferences and then Print and Scan. I'm not going to give you any more information. The rest you will have to research for yourself, and set up according to your unique set up. That's all part of the challenge.

Good luck, Cragsman. I have every faith in you.
